40CB Hard Wired Keyless Entry works with the following Garage Door Opener models.

| 140	150	240	350	450	550
140-6	150-6	240-6	350-6	450-6	550-6

Programming 40CB Wired Keyless Entry

**1** Unplug your garage door opener from the electrical outlet.

2 Open the cover on your inside wall console. You should see a 9 Volt battery and an adjacent PROGRAM/OPERATE switch. Slide the switch to PROGRAM.

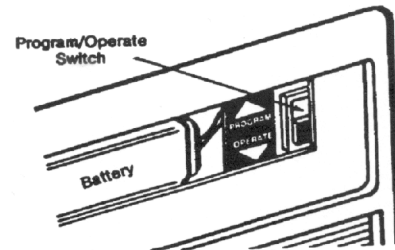

3 Enter your new 4-digit code into the keypad outside.

4 Slide the switch back to OPERATE and replace the console cover.

5 Plug the garage door opener back in to the electrical outlet.

6 Test the new 4-digit code. (If the keypad does not illuminate, replace the 9 Volt battery)
