| 1100	3000	4600	4600-2K	7200	8100M	9602	711WHC
2100	4100	4600-2	5100	8100	9601	710WHC	

Programming the 740CB Wireless Keyless Entry

1 Locate the LEARN BUTTON on the back or panel of the motor unit. You may need to remove a light cover or control center cover to gain access. This button may be yellow, white, gray or green in color and will have an LED indicator light next to it.
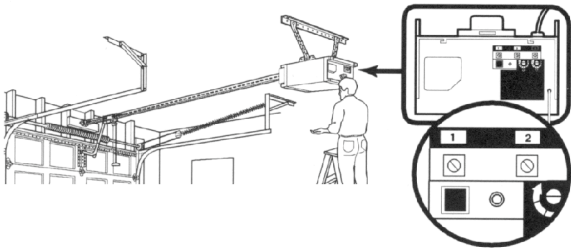

2 Press and release the LEARN BUTTON. This turns the receiver on for thirty seconds. Within this 30 second period, you must enter your new 4-digit PIN into the keypad and hold the ENTER button for five seconds.
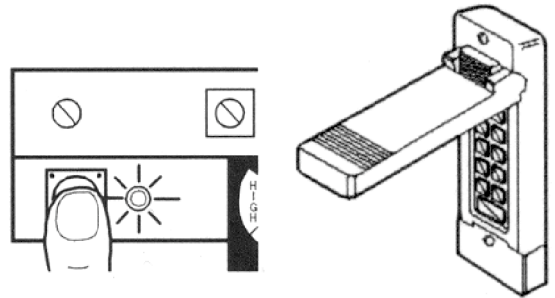

3 When the light on the keypad stops flashing, test your new code by entering the 4-digit PIN and ENTER.
